

THE PROJECT DESCRIPTION

The project: "The Camp at Przemysłowa Street in Łódź - the development and the promotion of the website, dedicated to the memory of the little known, WWII children's camp", includes the research, the documentation, as well as the educational and popularization activities within the frames of the website: www.obozprzyprzemyslowej.pl

This site is the result of the year's 2020 project: "The Camp at (?) Przemysłowa Street in Łódź". It disseminates the knowledge about the poorly researched and, to a very limited extent described, history of the camp for Polish children on Przemysłowa Street in Łódź.

The project involves expanding the content and the iconography of the website, and creating the English- and German-language versions. The effects of the detailed searches will be compiled by the specialists, who will work together, among other things, in an online discussion. The archival iconographic materials will be acquired as well as the linking rights to the publications about the camp. Lesson plans and workshops on the history of the camp will be tested. Numerous contests will be held to promote the site.
